The National Assessment Program — Literacy and Numeracy

In May 2013, national literacy and numeracy assessments were administered to students in Years 3, 5, 7 and 9 throughout Australia.

This report shows your child’s achievement in those assessments.

The information contained in this report should be considered together with school-based assessments and reports.

Literacy Assessment

The literacy assessment tasks measured student achievement in reading, persuasive writing and language conventions.

Reading
Students were required to read a range of texts similar to those used in Year 5 classrooms and answer questions of varying difficulty to show their understanding of the material.

Persuasive Writing
Students were directed to write in response to stimulus material. This writing task required students to generate and organise ideas and demonstrate their skills in vocabulary use, sentence structure, spelling and punctuation.

Language Conventions
Students were required to identify and correct spelling errors and answer multiple-choice questions on aspects of grammar and punctuation.

Numeracy Assessment

The numeracy assessment task measured student achievement across number; function and pattern; measurement, chance and data; and space. Questions required students to apply mathematical knowledge, skills and understandings in a variety of contexts.
Students read a range of factual and non-factual texts with some support from pictures and diagrams. Students were assessed on aspects of reading that included:

- finding information that is clearly stated or inferred
- connecting ideas and drawing conclusions
- understanding a character’s motivations and actions
- understanding a sequence of events
- understanding different opinions
- identifying the main purpose of a text, diagram or picture
- understanding the main idea of a text.

Students wrote a persuasive text and were assessed on aspects that included:

- supporting the reader and understanding the purpose of their writing
- structuring a persuasive text, developing ideas and points of argument, and making effective word choices
- using the conventions of written language such as grammar, punctuation, spelling and paragraphs.
Students were assessed on aspects of numeracy that included:
- solving problems involving addition, subtraction, multiplication and division
- continuing number patterns and completing number sentences
- using simple proportional reasoning
- interpreting graphs and tables
- understanding outcomes relating to chance
- using and comparing metric units
- identifying acute and obtuse angles
- estimating volume
- determining a scale
- visualising the features of 2-D shapes and 3-D objects.

Students were assessed on aspects of spelling, grammar and punctuation. Tasks included:
- correctly spelling frequently used one- and two-syllable words with less common spelling patterns
- identifying errors and then correctly spelling words with less common spelling patterns
- identifying examples of correct grammar usage
- recognising the correct use of a range of frequently used punctuation.
## Summary of skills assessed

The skills described in the following table represent those typically assessed in NAPLAN tests for Year 5 students. These skills increase in difficulty from the lowest to the highest band. A student achieving a result in a particular band is likely to have correctly answered questions involving skills in that band and in each band below it.

<table>
<thead>
<tr>
<th>Band</th>
<th>Reading</th>
<th>Persuasive Writing</th>
<th>Language Conventions</th>
<th>Numeracy</th>
</tr>
</thead>
<tbody>
<tr>
<td>8</td>
<td>Interprets ideas and processes information in a range of texts. Understands the use of dialogue to develop a character. Connects information across a persuasive text to analyse and interpret the context and infer the main message. Uses the context to interpret vocabulary specific to a text or topic.</td>
<td>Writes a cohesive text that begins to engage and persuade the reader. Makes deliberate and appropriate word choices to create a rational or emotive response. Attempts to reveal attitudes and values and to develop a relationship with the reader. Constructs most complex sentences coherently. Spells most words, including many difficult words, correctly.</td>
<td>Identifies errors and correctly spells most words with difficult spelling patterns (sincerely, breathes). Demonstrates knowledge of grammar and punctuation conventions in more complex texts, such as the correct use of pairs of conjunctions (neither, nor), forms of adverbs (more deeply), introducing pronouns (whose) and complex verb forms.</td>
<td>Solves non-routine problems including those involving multiples of whole numbers, decimals and fractions. Uses rules to continue number or spatial patterns. Identifies perimeter and area problems. Determines probabilities of outcomes of experiments. Classifies triangles and uses their properties. Identifies transformations of shapes and visualises changes to 3-D objects. Determines probability as a fraction. Compares and classifies angles and solves problems involving nets. Uses scale to determine distance on maps.</td>
</tr>
<tr>
<td>7</td>
<td>Applies knowledge and understanding of different text types and uses this to infer meaning and purpose. Identifies that complex implied ideas expressed within texts, including character motivation in narrative texts, the values of a writer in persuasive texts and the main ideas in information texts.</td>
<td>Writes a persuasive text with a developed introduction, an elaborated body and a clear conclusion. Develops plausible arguments through use of logic, language choices and effective persuasive devices. Joins and orders ideas using connecting words and maintains clear meaning throughout the text. Correctly spells most common words and some difficult words, including words with less common spelling patterns and silent letters.</td>
<td>Identifies errors and correctly spells most words with common spelling patterns and some words with difficult spelling patterns (identifies, nursery, unusual, valley). Demonstrates knowledge of grammar and punctuation conventions in longer sentences and speech, such as the correct use of conjunctions (while), compound verbs (could have) and apostrophes for possession (nobody’s).</td>
<td>Solves multistep problems involving relational reasoning. Compares and orders decimals. Calculates missing values in number sentences and sequences and compares single simple inequalities. Finds perimeters of simple and composite shapes. Calculates elapsed times across midday and midnight. Expresses probability as a fraction. Compares and classifies angles and solves problems involving nets. Uses scale to determine distance on maps.</td>
</tr>
<tr>
<td>6</td>
<td>Makes meaning from a range of text types of increasing difficulty and understands different text structures. Recognises the purpose of general text features such as titles and subheadings. Makes inferences by connecting ideas across different parts of texts. Draws conclusions about the feelings and motivations of characters and sequences events and ideas.</td>
<td>Organises a persuasive text using focused paragraphs. Uses some effective persuasive devices and accurate words or groups of words when developing points of argument and ideas. Punctuates nearly all sentences correctly with capitals, full stops, exclamation marks and question marks. Correctly uses more complex punctuation markers some of the time.</td>
<td>Identifies errors and correctly spells one- and two-syllable words with common spelling patterns (pleasing, ignored, hedge). Recognises grammar and punctuation conventions in shorter sentences and speech, such as the correct use of verb forms, capital letters for compound proper nouns, quotation marks for speech, apostrophes for contractions (he’s) and brackets.</td>
<td>Applies appropriate strategies to solve routine problems using skills including doubling and halving, simple multiplication and division and patterning. Converts between familiar units of time, calculates durations of events. Interprets and uses data from a variety of displays. Recognises nets of 3-D objects and symmetry in irregular shapes. Uses simple scales, legends and coordinate systems to interpret maps and grids.</td>
</tr>
<tr>
<td>5</td>
<td>Applies knowledge, makes inferences and processes information to infer the main idea in texts. Draws conclusions about a character in narrative texts. Connects and sequences ideas in information texts and identifies opinions in persuasive texts.</td>
<td>Structures a persuasive text to include an introduction and a body containing some related points of argument. Includes enough supporting detail for the writer’s point of view to be easily understood by the reader, although the conclusion may be weak or simple. Correctly structures most simple and compound sentences and some complex sentences.</td>
<td>Identifies errors and correctly spells one- and two-syllable words with common spelling patterns (cent, building). Recognises grammar and punctuation conventions in short sentences and speech, such as the correct use of appropriate structure, descriptive phrases, abbreviations, brackets and commas in lists.</td>
<td>Solves routine problems using a range of strategies. Demonstrates knowledge of simple fractions and decimals. Continues number and spatial patterns and compares familiar measures to estimate, calculate and compare area or volume. Reads gradients and scales and reads time on clocks to the quarter hour. Locates information in tables and graphs. Recognises familiar 2-D shapes after a transformation and identifies a line of symmetry. Visualises 3-D objects from different viewpoints.</td>
</tr>
<tr>
<td>4</td>
<td>Makes inferences from clearly stated information in short factual texts and stories. Identifies the meaning of some unfamiliar words from their context. Finds specific information in longer stories and factual texts including those with tables and diagrams.</td>
<td>Writes a persuasive text in which paragraphs are used to group like ideas and persuasive devices are used to attempt to convince a reader. Correctly punctuates some sentences with both capital letters and full stops. May demonstrate the correct use of capitals for names and some other punctuation. Correctly spells most common words.</td>
<td>Identifies errors and correctly spells one-syllable words with simple spelling patterns (white, would). Recognises grammar and punctuation conventions in short sentences, such as the correct use of pronouns (himself) and modifying or describing words.</td>
<td>Solves problems involving unit fractions, combinations of addition and subtraction of two-digit numbers and number facts to 10 x 10. Identifies division as the inverse of multiplication. Interprets timetables and calendars and reads time on clocks to the quarter hour. Locates information in tables and graphs. Recognises familiar 2-D shapes after a transformation and identifies a line of symmetry. Visualises 3-D objects from different viewpoints.</td>
</tr>
<tr>
<td>3</td>
<td>Makes meaning from simple texts with familiar content and themes and finds directly stated information. Finds some connections between ideas that are not clearly stated and identifies simple cause and effect. Makes some inferences and draws conclusions, such as identifying the main idea of a text.</td>
<td>Attempts to write a persuasive text containing a few related ideas or points of argument, although these are usually not elaborated. Correctly orders the words in most simple sentences. May experiment with using compound and complex sentences but with limited success. Orders and joins ideas using a few connecting words but the links are not always clear or correct.</td>
<td>Identifies errors and correctly spells one-syllable words with simple spelling patterns (white, would). Recognises grammar and punctuation conventions in short sentences, such as the correct use of pronouns (himself) and modifying or describing words.</td>
<td>Solves single-step problems involving addition, subtraction or simple multiplication. Produces representations of unit fractions and completes simple number sentences. Converts between familiar units of measurement and uses familiar units of measure. Describes outcomes of simple chance events. Uses common features and properties to classify families of shapes and objects, and recognises symmetrical 2-D shapes. Locates positions using grid references.</td>
